Our Home Your Home

Corte della Maestà is part of the bishop's palace (XIV century), the home of the owners, and represents the continuation of the art collection that Paolo and Cristiana have been building up for decades. With ancient and contemporary paintings, sacred and secular objects, furniture purchased in antique markets and shops in Italy and in the world, an incredible collection of mirrors, ceramics and antique carpets, this spectacular sequence of art objects bears witness to the passion that underlies the decision to create the unique and inimitable place that is Corte della Maestà.

Historic Charme – Experiences

Corte della Maestà is a timeless place where experiences are not necessarily sought or created, but can be found in small details: the silence of the night when it seems like it is snowing outside, the lights and colours of the sunset and dawn, the cats that live in the village and which accompany the tourists on their walks along the alleyways, the family cooking of the old trattorias in the village, reading a book in the shade of a fruit tree in our garden surrounded by the continuous dancing of blossoms, breakfast or an aperitif in the large kitchen in the house or in the garden, the spa and a personalised candle-lit massage, a glass of wine in front of the houses' fireplaces against the soundtrack of classical music, playing the piano for guests, watching a movie or listening to good music in Tana del Lupo. La Corte promotes the ancient art of “dolce far niente”, embracing the slowness of living, taking care of the soul, contemplating beauty and pausing the franticness of our daily lives for a moment. This fresco of emotions can only be found here.
