

VINCENZO DE COTIIS ARCHITECTS

STRAF HOTEL | H₂O WELLNESS BOUTIQUE

Hidden in the heart of a historic building from the end of the 19th century, located few steps from the Duomo Cathedral, the new STRAF Hotel H₂O Wellness Boutique appears as a refined place, dedicated to well-being and relax, consisting of sauna, Turkish bath, emotional shower, relax area and a swimming pool where practice counter-current swimming and whirlpool. A functional and minimalist space that reveals a sophisticated elegance where guests feel at ease.

The Architect Vincenzo De Cotiis' language and concept, who wins in 2021 the ElleDeco International Design Awards, remain consistent with the hôtellerie project dated 2003 and re-interpret the new spaces in a contemporary way.

Guests enter an elegant area where the use of contrasting materials, modern and traditional at the same time, evoke a pleasant sense of calm and peace. They can breathe an intimate and reassuring atmosphere and dedicated themselves to body care.

The H₂O Wellness Boutique is characterized by light and dark tones: the white quartz, the light plaster on the walls and ceiling, the dark granite flooring, an ancient and precious material also proposed on the wall; all modulated by metallic accents, such as cast brass, the steel arch which emphasize the passages between various environments.

The materials have been carefully chosen and create a game of reflections, merging with WATER: the powerful element and substance with thousand properties. Essential benefit for body and mind, source of life and regeneration, primordial force that moves and transforms everything around us.

The result is an ethereal environment that highlights the different materials and surfaces combination which evoke a tactile and sensorial experience.

TAKE YOUR TIME!
